Tools: Git, GitHub, REST APIs, AWS S3
Soft Skills: Problem Solving, Communication, Teamwork

PROJECTS

Personal Portfolio Website
Designed and developed a personal portfolio website to showcase projects and skills. *Technologies: HTML, CSS, JavaScript, Bootstrap*

Resoline CRM — Full-Stack Business Operations Platform

- Built Resoline CRM, a full-stack business operations platform using React.js, FastAPI (Python), and MySQL for leads, customers, employees, and role-based access.
- Implemented lead and customer management with detailed workspaces, document handling, and AWS S3 storage for attachments and photos.
- Developed attendance with GPS punch-in/out, late-punch approval workflows, leave management, and live map-based location tracking for field staff.
- Designed a Kanban task board with priorities, due dates, comments, time logs, completion tracking, and file attachments.
- Added inventory and stock management with warehouses, purchase receipts, transfers, weighted-average costing, and reorder alerts.
- Built vehicle tracking and fuel expense claims with meter-photo verification, distance/fuel calculation, and admin approval flows.
- Delivered expenses, payroll/salary, operations workspace, service maintenance, dashboards, and monthly reporting modules.
- Secured the app with JWT authentication, permission-based roles, REST APIs, and a responsive Tailwind/Radix UI.
